Ziqi Yang

Research Interests

Human–AI Interaction in Healthcare; LLM- and Multimodal AI–mediated Clinical Communication; Precision and Family Health; AI-Supported Health Sensemaking

Education

2024-2029 (Expected) **Ph.D. in Informatics**, *University of California, Irvine*
Advisor: Yunan Chen, Daniel Epstein

2021-2023 **M.S. in Information**, *University of Michigan, Ann Arbor*
Focus: Human-Computer Interaction and User Experience
Research Advisor: Mark Newman, Pedja Klasnja

2021-2021 **Visiting Student**, *University of California, Berkeley*

2018-2022 **B.S. in Electrical and Computer Engineering**, *Shanghai Jiao Tong University*
Research Advisor: Zhanxun Dong

Publications

C. 4 Ziqi Yang, Daniel Epstein, Yunan Chen
"Sharing Women's Health Experiences Influenced by Genetic Factors: Practices, Challenges, and Opportunities"
CHI'26

C. 3 Ziqi Yang, Yuxuan Lu, Jennifer Bagdasarian, Vedant Das Swain, Ritu Agarwal, Collin Campbell, Waddah Al-Refaire, Jehan El-Bayoumi, Guodong Gao, Nawar Shara, Dakuo Wang, Bingsheng Yao.
"RECOVER: Designing a Large Language Model-based Remote Patient Monitoring System for Postoperative GI Cancer Care"
CSCW'26 To be published in **PACMHCI'26**

C.2 Ziqi Yang, Xuhai Xu, Bingsheng Yao, Ethan Rogers, Shao Zhang, Stephen Intille, Nawar Shara, Guodong Gordon Gao, and Dakuo Wang.
"Talk2Care: An LLM-based Voice Assistant for Communication between Healthcare Providers and Older Adults."
★**IMWUT'24 [Distinguished Paper Award]**, doi.org/10.1145/3659625

C.1 Siyi Wu, Weidan Cao, Shihan Fu, Bingsheng Yao, Ziqi Yang, Changchang Yin, Varun Mishra, Daniel Addison, Ping Zhang, and Dakuo Wang. 2025.
"CardioAI: A Multimodal AI-based System to Support Symptom Monitoring and Risk Prediction of Cancer Treatment-Induced Cardiotoxicity."
CHI '25, doi.org/10.1145/3706598.3714272

J.1 Liuqing Chen*, Yu Cai*, Yuyang Fang, Ziqi Yang, Duowei Xia, Jiaxiang You, Shuhong Xiao, Yaxuan Song, Lingwei Zhan, Juanjuan Chen, and Lingyun Sun. "Observing a robot peer's failures facilitates students' classroom learning." **Science Robotics**, 2025, doi.org/10.1126/scirobotics.adu5257

Research Experience

2024 – Present **Graduate Student Researcher**, *University of California, Irvine*

Women's Health Systematic Review and Genetic Health Survey [C.4]

- Designed and analyzed a **mixed-method survey (N = 249)**, integrating **thematic qualitative analysis** with **ordinal logistic regression, Spearman's correlation, and** χ^2 to examine how perceived genetic impact and importance relate to age, family size, and reproductive experiences, and challenges in managing **genetic health**.
- Designing **AI-informed design probes** to study cross-generational collaborative tracking and sharing of genetic health information, exploring design strategies for **AI-mediated sensemaking, communication, and family coordination**.

2025 – Present **Research Collaborator**, *University of California, Irvine*

Ambient AI in Clinical Settings

- Conducted **inductive and deductive qualitative coding and analysis** of clinician interviews and edits on clinical notes generated by **Ambient AI** such as Abridge to examine review strategies and documentation workflows.
- Synthesized findings to identify **recurring edit patterns, decision rationales, and sources of friction** in clinician–AI collaboration.
- Discussed analytical results with interdisciplinary research and clinical collaborators to derive **design implications** for improving AI-assisted clinical documentation systems; manuscript under review at *JAMIA*.

2023–2024 **Graduate Student Research Assistant**, *Northeastern University*

LLM-Facilitated Patient–Provider Communication [C.1–C.3]

- Conducted **interviews with patients and clinical experts** (oncologists, cardiologists, primary care physicians, nurse practitioners) to identify communication barriers in AI-supported care.
- Designed and prototyped **LLM- and multimodal AI systems** for patient–provider communication and monitoring, including **Talk2Care**, **RECOVER**, and **CardioAI**.
- Built **AI-powered voice assistants and clinician dashboards** using GPT-4, Alexa, Python Lambda, and React, integrating conversational and sensing data.
- Evaluated systems through **mixed-method studies** (interviews, SUS surveys, deployment studies), deriving design implications for **LLM-mediated clinical workflows**.

2024 **Research Assistant**, *Zhejiang University*

Social Robots and Education [J.1]

- Programmed Python scripts for the NAO social robot and designed a **between-subject experiment** on **generative AI–driven embodied learning**.
- Applied **quantitative analysis** (learning and emotion scales, ANCOVA) to evaluate knowledge acquisition and emotional outcomes.
- Led **qualitative analysis** for survey data using iterative coding and thematic analysis, identifying 23 axial codes and 6 themes (inter-rater reliability k=0.85).

2022–2024 **Graduate Student Research Assistant**, *University of Michigan, Ann Arbor*
Designing mHealth Interventions
- Prototyped empathetic **exercise coach chatbots** (scripts + Figma) to study long-term user–chatbot relationships; conducted **pilot studies** (n=6) with surveys and interviews; analyzed data from Amazon Mechanical Turk to reveal user preferences.
- Developed **Just-In-Time Adaptive Interventions (JITAI)** powered by LLM chatbot as technology probes for **behavior change** in promoting physical activity.

Selected Skills

Programming **Python, C, C++, R, JavaScript, SQL, Matlab**
Web **HTML, CSS, React, Flask, MongoDB, REST APIs**
UXD & R **Figma, Adobe XD, Illustrator, Miro, Tableau, Lovable**

Work Experience

2023 **Product Manager Intern**, *Red (Xiaohongshu)*
- Designed and evaluated an **unbiased sampling hierarchy** and review **dashboards** for live-streaming content, improving accuracy by 10%.
- Conducted **A/B testing** and **SQL-based analysis** to evaluate **search/recommendation** models, improving precision–recall consistency by 5% and achieving >90% human-review stability.

2023 **Product Manager Intern**, *eBay*
- Conducted **competitive analysis** and interviews to identify pain points in **engineering workflows** for **Data Lake Studio**.
- Translated findings into prototypes for **big data** processing and **machine learning pipelines**, iterating designs based on stakeholder feedback.
- Developed roadmaps for **access control** and **data pipeline** features and improved developer documentation.

2022 **User Experience Designer Intern**, *Microsoft*
- Conducted **competitive analysis** and **journey mapping** for Dynamics 365 **business analytics** users, focusing on **collaboration** workflows.
- Designed mid- and hi-fi prototypes for **AI-supported** route and formula **management** in supply-chain systems.
- Collaborated with PMs and engineers to translate insights into product and **information architecture** improvements.

2019 **Software Engineer Intern**, *Hangzhou InfoCore Technology*
- Analyzed **big data workflows** for multi-tenant cloud backup systems using Soft-RoCE.
- Tested **data processing pipelines** in the Hadoop ecosystem (HDFS, MapReduce) with **Java, R, and Python**.

Teaching Experience

Teaching Assistant

2025 **INF 133 User Interaction Software**, *Instructor: Dr. Daniel Epstein*
3 Quarters
Help students with website development and understanding framework concepts; Design assignments to understand the use of LLMs in designing and improving user interfaces

INF 285 Interactive Technology Studio, *Instructor: Dr. Daniel Epstein*

2024 **INF 115 Software Testing and Quality Assurance**, *Instructor: Dr. James Jones*
